Art Unit: 1795

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ono *et al.* (JP 10-83,821) in view of Watarai *et al.* (JP 2003-77,539), for reasons of record.

Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ono *et al.* in view of Watarai *et al.* as applied to claim 1 above, and further in view of Gan *et al.* (US 6,759,170), for reasons of record.

Applicant's arguments filed 16 October 2008 have been fully considered but they are not persuasive.

Applicants argue that the combination of Ono *et al.* and Watarai *et al.* do not establish a reasonable expectation of success, and thus do not support a rejection of the present claims. This is not persuasive because Watarai *et al.* explicitly teach the benefits of their system, such as mechanical strength and ability to deal with changing temperature (section 0006), and because the ionic conducting phrases of both references are based on polymers, thus showing that the disclosures are mutually relevant. Because one polymer is taught to support another, and because the conductive phases of the respective references are functional equivalents, a reasonable expectation of success would be supported. Regarding the *in situ* polymerization, these claims are drawn to products, and are thus considered for the structural characteristics. The present claims would encompass the composite electrolyte comprising the two polymers,

regardless of how made, absent a showing that the particular process necessarily confers a particular structural characteristic to the claimed subject matter.

The amendment of 16 October 2008 has removed the previous rejection under §112.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Kalafut whose telephone number is 571-272-1286.
